

Day of Banks and Saving Banks

On 24 September 2026 the Day of Banks and Saving Banks takes place during the security Fair. In addition to the interesting conference program more than 500 international exhibitors present their newest security innovations between 9:00 a.m. and 6:00 p.m.

For fair visitors free of charge, a registration is not needed

**Date: Thursday,
24 September 2026**

**For: Banks, Saving Banks,
Insurers, Police,
Security Consultants**

**Place: Messe Essen, Hall 7,
Nobertstraße, 45131 Essen
(Germany)**

10:00	Opening
10:05	<p>Security-related prevention for financial institutions – Protecting safe deposit locker facilities and ATMs</p> <p>Following a sharp rise in ATM explosions up to 2023, measures taken by authorities, banks, and insurers contributed to a significant decline in the figures. The presentation will also address behavior-oriented prevention of burglaries involving safe deposit locker facilities.</p> <p><i>Tassja Buchheit, LKA Rheinland-Pfalz</i></p>
10:25	<p>Securing safe deposit locker facilities – Dream or nightmare</p> <p>Heists involving core drills as well as daytime attacks on safe deposit locker facilities received increased media attention in 2026. The presentation outlines protection options for safe deposit locker facilities for both attack scenarios, including structural, organizational, and electronic measures.</p> <p><i>Udo Wolf, R+V Allgemeine Versicherung AG</i></p>
10:55	<p>Attacks on ATMs using hydraulic tools</p> <p>This short presentation reports on attacks in Europe and the United States, as well as on the new European standard for protecting ATMs against this modus operandi.</p> <p><i>Falko Adomat, ESSA e.V.</i></p>
11:05	<p>Preventing ATM explosions in Switzerland – Cooperation between the police and the industry</p> <p>The presentation will show, how in Switzerland, the police, banks, and ATM operators cooperate in the field of prevention. This well-established exchange at expert level is paying off: compared with 2024, the number of explosions fell by 50% last year.</p> <p><i>Philippe Piatti, Schweizer Bundesamt für Polizei (fedpol)</i></p>
11:30 Elevator Pitches	<p>Minimising risk, combining core drill protection and integrated alarm in one – safes and strong rooms with planar protection</p> <p><i>Stephan Seifert, Gunnebo Safe Storage</i></p>
	<p>Future proofing security and efficiency with connected safe lock platforms aligned with EN 17646 for secure, compliant, connected environments</p> <p><i>Cristian Bragantini, dormakaba Safe Locks</i></p>
	<p>Simplifying, speeding up and making processes more secure: How the EAST-HOUSE ProLogic OTC system achieves this through the use of smartphones</p> <p><i>Frank Bennemann, Nanjing Easthouse</i></p>
	<p>Cyber resilience act for certified high-security locks in the network according to EN 17646</p> <p><i>Detlef Lücke, INSYS Microelectronics</i></p>
	<p>Connected Locks and CRA Compliance – How Tecnosicurezza locking solutions support CRA policy</p> <p><i>Olof Sandberg, Tecnosicurezza</i></p>
